“The bucket that made **history**”

The first crusher bucket, produced and patented by MB in 2001, is still the most popular model for medium to large sized companies.

Renewed and improved over the years, the BF 90.3 is suitable for excavators over 20 Ton in weight. It is compact, versatile, and suitable for all types of recycling operations, for road work, pipelines, demolition and excavation.

Despite its size and weight compared to the larger models, it achieves a significant production.

AREAS OF APPLICATION

- QUARRIES
- DEMOLITION
- RECYCLING
- EXCAVATION
- MINES
- ROAD WORKS
