

The HX300AL Crawler Excavator is part of Hyundai's brand new A-series: a fresh generation of construction equipment that complies with the European stage V emission levels. But it does much more than that! While fulfilling regulatory demands, Hyundai aimed for a ground-breaking level of customer satisfaction with maximum performance and productivity, better safety, more convenience and improved uptime management.

From its robust exterior design to its smart performance-enhancing technologies, the HX300AL opens up a world of new possibilities where tiny efforts move mountains. It's time to experience the Hyundai Effect!

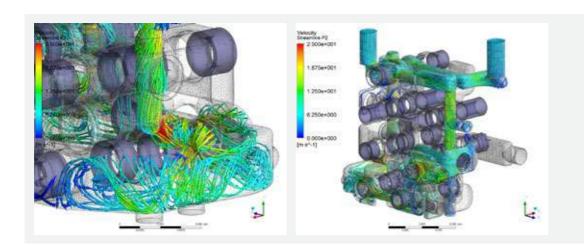

POWER AND EFFICIENCY TO MAKE YOU MORE PRODUCTIVE

The HX300AL is powered by a robust Stage V-certified Cummins engine with an innovative integrated after-treatment system that reduces both emissions and maintenance requirements. It delivers all the power you need to handle demanding jobs, along with fast levelling and truck loading times and excellent fuel economy.

A range of smart technologies are included for precise management of the engine output and pump flow rate. A new EPIC (Electronic Pump Independent Control) system improves efficiency through computerised individual control of the hydraulic pumps. Additional features optimise operation and monitoring to enhance productivity every single day.

EPIC (Electronic Pump Independent Control) improves fuel efficiency while maintaining productivity through computerised individual control of hydraulic pumps. The system helps to reduce losses in hydraulic flow and maximise production capacity.

High Idle Idle Relief Oper.

40% 3%

"I'm saving on fuel and reducing emissions without having to compromise on productivity!" The **Eco Report** feature helps you to develop efficient working habits by displaying real-time information about machine performance.

Like all A-Series machines, the HX300AL features our all-in-one exhaust aftertreatment system which cuts emissions and operating costs while enhancing reliability and simplifying maintenance.

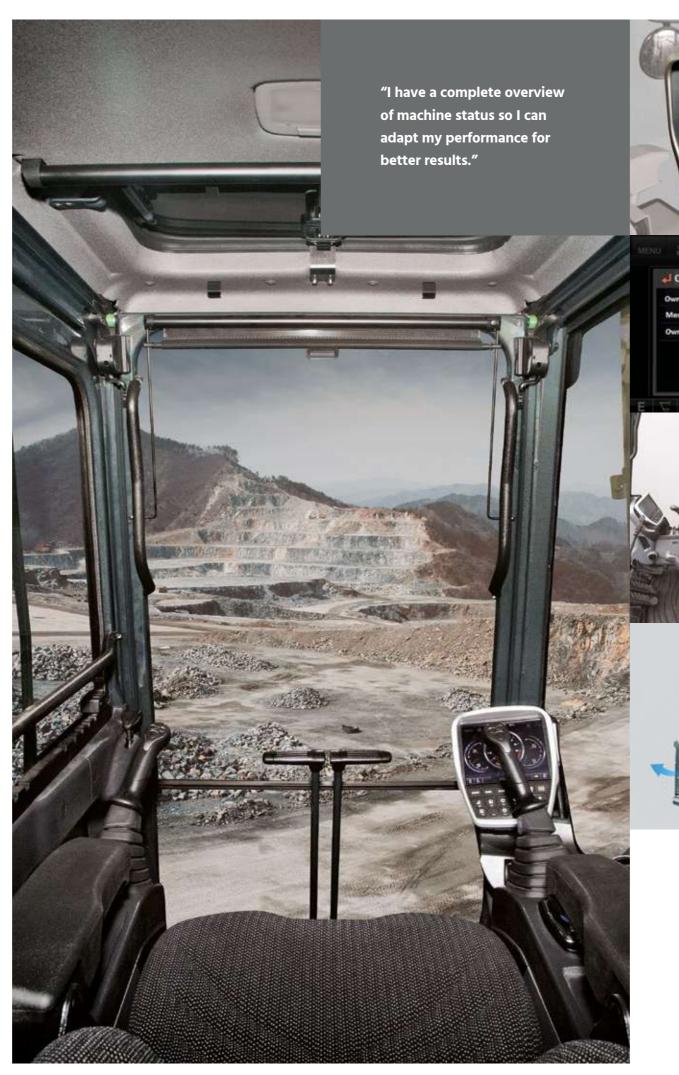

Easy-to-use **3D Machine Guidance**gives precise feedback on the bucket
position as well as 3D grading assistance
and jobsite mapping in real time. This
reduces manpower requirements on site
and enhances operator performance. The
system includes an optional **Hyundai Ready automatic surveying system** for
excavators which provides work guides to
further improve work speed and productivity.

A CABIN DESIGNED AROUND YOU

The HX300AL cabin was designed as a comfortable working environment that enhances productivity and reduces fatigue for every operator. Pleasant and spacious, it features a high-quality, adjustable seat and comfortable reach to all controls.

A range of technologies enable easier machine monitoring, while the audio system includes radio, USB and AUX input to keep you entertained during your working day. The overall design places you right at the centre of the Hyundai Effect, with a world of convenience and control at your fingertips.

The instrument panel is optimised to provide quick, easy access to machine status information as you work. It features an 8-inch touchscreen monitor for excellent legibility.

Menu functions can be set by the machine owner, who can also provide or restrict access for machine users by using a password to lock or unlock the list.

The HX300AL has a luxurious air suspension seat with heating as standard. The ergonomic joystick makes operation comfortable and intuitive.

The heating and air conditioning system efficiently regulates and directs airflow in the cabin.

Setting

PROTECTION FOR CO-WORKERS AND MACHINERY

Small details can make a huge difference when it comes to safety and security. The HX300AL offers all-round protection for you, your workmates and your equipment. Its cab and engine hood feature a new design that allows maximum visibility, while All-Around View Monitoring (AAVM) gives you a clear overview of your surroundings. By helping to ensure an accident-free worksite, the HX300AL contributes to the peace of mind and productivity that form part of the Hyundai Effect.

The All-Around View Monitoring (AAVM) camera system gives you a 360° overview of your immediate working environment. It also includes Intelligent Moving Object Detection (IMOD) technology that senses and warns you when people or objects come within five metres of the machine.

The **open design of the cabin side door** gives the operator a clear, unimpeded view to the exterior. The **door handle** design has also been redesigned for more convenient access.

The **auto safety lock** feature prevents unintentional ignition. While the auto safety lock is activated, the excavator is not controlled by the RCV lever.

"I can always see what's going on around me, even when weather conditions are poor or the machine is moving."

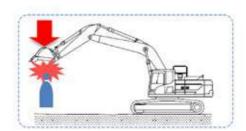

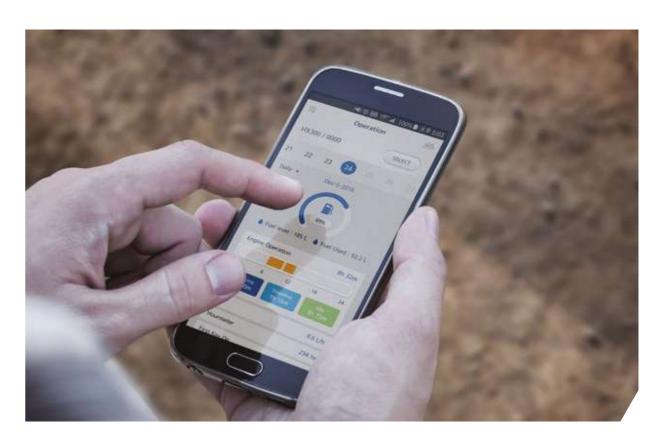

ADVANCED DIAGNOSTICS AND SERVICING SUPPORT

The peace of mind that comes with quick, low-effort servicing is also part of the Hyundai Effect. The HX300AL is designed to make maintenance as convenient as possible. All components and materials have been optimised to ensure a long, trouble-free life. Hyundai's Hi Mate remote management system uses GPS satellite technology to provide the highest level of service and support. The HX300AL also features our new Engine Connected Diagnostics (ECD) system which immediately reports any engine failure to both Hi Mate and the engine manufacturer to ensure the fastest, easiest resolution.

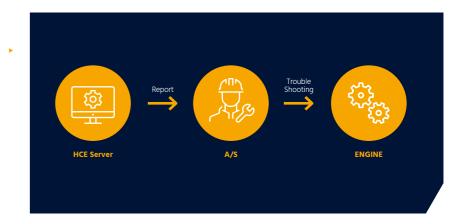

HIMATE

For maximum convenience and security, the HX300AL features Hyundai's exclusive Hi Mate remote fleet management system, which uses mobile data technology to provide the highest level of service and support. You can monitor your machines from any location via a dedicated website or mobile app, with access to working parameters like total engine hours, machine utilisation, actual performed working hours and fuel consumption and machine location. The system makes it easy to evaluate machine productivity and plan servicing and maintenance tasks, as well as any required cost saving measures. It also offers geofencing to protect your machines against theft and unauthorised usage.

ECD (Engine Connected Diagnostics)

provides troubleshooting advice as well as tailored servicing and parts support from Cummins Quick Serve. Service technicians are supported with remote diagnostics reports allowing them to prepare for site visits and bring the right tools.

READY FOR ACTION AND BUILT TO LAST

You need to know that the investment you make today will help to sustain your business over the long term. That's why we prioritised reliability throughout the development of the HX300AL, from design and manufacturing to quality control. We improved engine reliability by integrating exhaust after-treatment and replacing EGR with a simplified, single-module system that's easier to maintain. The upper and lower frame structures are reinforced for high load work, while the attachments have been rigorously tested for the roughest conditions. The overall aim is to minimise downtime and repairs so that you can stay on schedule, avoid unexpected costs and protect your profits.

High-grade hoses with outstanding resistance to heat and pressure provide maximum durability, even in rough working conditions.

The reinforced **pins**, **bushings** and **polymer shims** are designed for an extended lifetime.

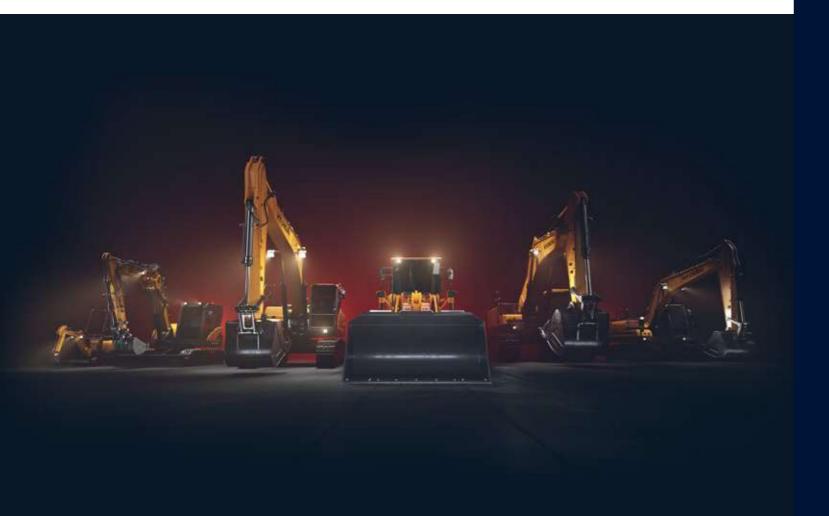

The engine and **exhaust aftertreatment** system are integrated for simplified control and maintenance.

FOCUSED TECHNOLOGIES FOR THE RESULTS YOU WANT

Hyundai's crawler excavators are designed to create better conditions for operators and deliver the ultimate ownership experience. Every detail is carefully fine-tuned to match your needs in the field, including better safety and comfort, higher productivity, maximum uptime and easy servicing. It's all part of the Hyundai Effect.

Lifting capacity is based on ISO 10567.
 Lifting capacity of HX Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.

^{3.} The Lift-point is bucket pivot mounting pin on the arm (without bucket mass). 4. (*) indicates load limited by hydraulic capacity.

Lifting capacity is based on ISO 10567.
 Lifting capacity of HX Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.

^{3.} The Lift-point is bucket pivot mounting pin on the arm (without bucket mass). 4. (*) indicates load limited by hydraulic capacity.
