“Ideal for large projects”

A large bucket to ensure great results. The BF 120.4 is suitable for excavators weighing more than 28 Ton, and was created to meet the specific needs of crushing in quarries and landfills for aggregate recycling, in large job sites to reduce the volume of materials resulting from demolition work.

With a productivity of more than 50 m³/h, a capacity of about 1,30 m³, and a total weight of 4,90 Ton, the BF 120.4 crusher bucket is an effective machine that has established itself as the premier crusher in the crushing field in just a few years.
